Hug a Hoody — Virtually of course... and in 2020

If the VR headset you just bought for an awful lot of money looks like a giant pair of lab glasses not unfit for Muppet Beaker, it's sooo 10 seconds ago! A VR-2020 headset concept named Light and Shadow, the designers proclaim, "concentrates on how to make VR both more social and more solitary in very different ways." With features like wireless headsets and accessories, plus emotion and mood reading smart fabrics.

Mindless bicycling takes a turn with the Smart Jacket

Holland has more bicycles than people in the country, and the same goes for smartphones. Although it's ethical to say that cyclists are quite vulnerable in traffic compared to motorists, in Holland they rule the roads, especially in large cities where
